# THE CAPTIVATING XL3

The Dreamoc XL3 is a large mixed reality display which makes it an ideal solution for bigger spaces such as retail focal points, hotel lobbies or office reception areas. It is perfect for larger areas where you want to make a big impression on passers-by and have them stop and pay attention to your brand and product.

It is also a great solution for bigger events like fairs and trade shows, and because of its three visible sides it allows a rather large audience to get a look at the magic inside.

## SIMPLE TO MANAGE

Impressive as the XL3 is, it is as easily operated as any other of our solutions. Just plug it in and you are instantly ready to dazzle your audience with mixed reality experiences. One side of the glass optics serves as an access point to easily exchange the physical product inside the display, and the holographic content is managed from a discreet opening at the top, holding a standard USB-device. The Dreamoc XL3 is designed to make a grand impression on your audience, and placing your product inside with stunning holographic content encircling it guarantees to grab everyone's attention. With your product encircled by stunning holographic content is guaranteed to grab anyone's attention.

## ADAPTABLE AND VARYING

This display is big but also flexible when mounted on the stand fitted with wheels, making it an easy task to move it around as you see fit. Perhaps you want it placed in front of a store in a mall during the day, but need to have it safe inside after hours, and moving it about like that is no big deal with the XL3. The display's multi-purpose stand is available in two different varieties depending on your specific needs. The Basic stand has an open and airy base creating a visually calm setting, and the Shelf Option on stand comes with a back panel and a single shelf for displaying products, pamphlets, or whatever you may want.

## HIGHLIGHTED FEATURES

See complete factsheet [here](#)

**Interactive possibilities** - Add interactivity to further strengthen the experience, captivate the audience and increase dwell-time.

**Built in audio** - No need for external speakers - the audio is built in to the display. Easily adjust the sound level with the remote control.

**Easy Access Door** - Seamless and secure access to the displayed product from the side of the display.

**Top-loading Panel** - Change content at a glance from the top of the display.

**Crystalline™ Optics** - New high-end glass optics that is very durable and enables an even sharper image quality.

**Tough Skin** - The wooden housing is protected by an extremely durable coating to accommodate for everyday usage.
